

# FIX MEDICARE.

*Promote Access to Medicare Physicians.*

Physicians Caring for Texans

## Medicare cuts could jeopardize timely access to doctors.

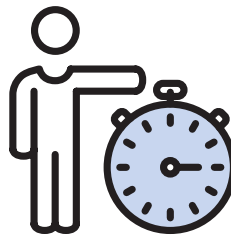

The federal government has imposed drastic cuts on physician payments in the Medicare program, which threaten physician practices and hinder patient access to care.

Because of Congressional inaction at the end of last year, a new round of devastating Medicare physician payment cuts went into effect on Jan. 1, 2024.

If this latest cut is left in place, physician Medicare payments will have been reduced by almost 10% in four years. Compared to inflation, physicians' Medicare payments have fallen nearly 30% over the last two decades.

## The clock is ticking.

If Congress doesn't act now, physician practice viability will be harmed and some physicians could be forced to close their doors for good, or limit the Medicare patients they can see, leaving patients without access to high-quality care.

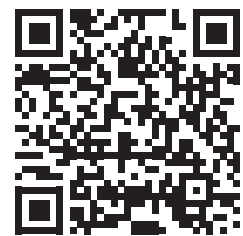

## You can help! Tell Congress to fix Medicare now.

Please urge Congress to stop the Medicare cuts and safeguard patient access to health care.

**Thank you.**

**TAKE ACTION**
